

The competition held by American Association of Petroleum Geologist - Universitas Padjajaran Student Chapter uses the British Parliamentary System debate system. Each phase of the system consists of four groups, Opening Government (OG), Opening Opposition (OO), Closing Government (CG), and Closing Opposition (CO). "Each of the phases is to debate motions on Indonesia's energy problem, one of those is privatisation of state oil company Pertamina," he said.

Fauzy said in the final they had the role as Closing Government. The UGM B team (Handika Lazuardi and Jesslyn Jane) acted as Closing Opposition, the UPN A team as Opening Government and Trisakti team as Opening Opposition, debating the motion *As Indonesian Government, This House Would Ban Fossil Fuel Cars*.

"We're excited and proud that the UGM team has won the championship in this competition. We hope this achievement would sustain next year," he said.
